

YSU Undergraduates Participating in REU for Summer 2007

Tyler Drombosky participated in a United States - Hong Kong REU in Numerical Analysis and Scientific Computing in Hong Kong, China through the Colorado School of Mines this summer. The research was entitled "Effective Condition Number".

David Martin participated in a Computational Materials Science REU at Iowa State University this summer. He investigated "Molecular Simulations/Programming."

Jared Ruiz participated in a Computational Number Theory and Combinatorics REU at Clemson this summer. His problem dealt with extensions of finite fields.

Doug Wajda had an internship at Orbital Research in Cleveland, Ohio this summer.

Matt Ward participated in the Auburn University REU in Discrete Mathematics and Algebra. He researched the sum-of-divisors and abundancy index in the Gaussian integers.
